📁 TECHNICAL SKILLS

👤 Profile

An enthusiastic and forward-thinking IT professional eager to contribute skills and expertise in a dynamic and stimulating work environment. Seeking an opportunity that fosters continuous learning, encourages innovation, and motivates employees to excel, ultimately contributing to the company's growth in the ever-evolving IT industry.

🎓 Education

BSc (Hons) in Computer Science

Staffordshire university [🌐](#)

10/2022 – present | United Kingdom

Higher National Diploma in Software Engineering

National Institute of Business Management (NIBM) [🌐](#)

2021 – 2022 | Kandy, Sri Lanka

Diploma in Software Engineering

National Institute of Business Management (NIBM)

2020 – 2021 | Kandy, Sri Lanka

Certificate of Computer Science

National Institute of Business Management (NIBM)

2019 – 2020 | Sri Lanka

👜 Professional Experience

OpenCode Labs

Intern - Software Engineer

02/2023 – 08/2023 | Kandy, Sri Lanka

- As an intern software engineer, I developed web applications using Laravel, PHP, CSS, and HTML, prioritizing exceptional performance and user experiences. I actively participated in database design and integration, managing data seamlessly. Additionally, my code reviews and feedback improved overall code quality and fostered a positive team environment. Overall, I contributed to the successful delivery of performance applications by applying my web development, database management, and code review skills.

📁 Projects

Fish guide Pro - Individual

(final year project)

- This is an android based mobile application. This project about fresh water fish in Sri Lanka is doing fish identification. This is done by using mobileNet and training a model.

OTHER SKILLS

- Team Management
- Problem Solving
- Time Management
- Leadership

JackPet Shop - Individual

(final year web frame work 1st semester assignment)

- This is a project done for a final year web framework 1st-semester assignment using vue js. Firebase authentication is used here and a news API provides news about animals.

HR Management System – Group

(2nd-year FINAL PROJECT)

- Laravel, MVC architecture, and VS code IDE are used to develop this system.

Implemented a Gas CylinderMonitoring System - Group

(1st-year final project)

- An IoT-based project is an lp gas monitoring system. The capacity of the cylinder can be monitored through a C # .net standalone application and database using Microsoft SQL

Gredots

(Open codes Labs company project contributions)

- In the ongoing project Gredots by OCL, I took the lead in developing an intuitive and visually appealing user interface (UI) for an advanced employee management system.

Asiri Printers

(Open codes Labs company project contributions)

- Asiri Printers is a responsive and user-friendly web application developed exclusively for a printing shop, enabling seamless access and an enhanced user experience.

JIT Lanka Tours

(Open codes Labs company project contributions)

- JIT Lanka Tours is a professional tourism website. We curate and develop travel packages by directly collaborating with clients, obtaining crucial information to deliver personalized and tailored experiences.
